Pune, India

Targeting challenging opportunities in Backend Development, .NET Application Engineering, API Development or Technical Solution Delivery, leveraging expertise in .NET 8, ASP.NET Core, EF Core, SQL Server, RESTful APIs, multi-tenant architecture, third-party integrations.

PROFILE SUMMARY

- Backend .NET Software Engineer with 3 years of experience** in developing, enhancing and supporting enterprise-grade automotive management applications serving multi-company bodyshop operations.
- Expertise in **.NET 8, ASP.NET Core, C#, EF Core, ASP.NET Framework 4.8, RESTful Web APIs, JWT Authentication and SQL Server**, with hands-on exposure to scalable backend services and multi-tenant application environments.
- Proven record of **performance optimization and process automation**, including development of SQL Server-based Bulk Copy functionality that reduced technician processing time by **70%** across hundreds of job cards and estimation records.
- Experienced in **application modernization, legacy system enhancement, third-party integrations & scheduled service development**, including Windows Services, automated reporting, vehicle data imports, business-data synchronization and paint/parts integrations.
- Skilled in **technical system reliability & operational efficiency**, including automated file-processing error handling that reduced maintenance workload by **80%**, QR/Barcode-enabled workflows and backend APIs supporting vehicle inspection and real-time bodyshop operations.

CORE COMPETENCIES

- Backend Application Development
- .NET Application Engineering
- RESTful API Development
- Application Modernization & Support
- Microservices Architecture
- API Integration & Third-Party Integrations
- Server Database Optimization
- Multi-Tenant Application Architecture
- Application Performance Optimization
- Legacy System Modernization
- Backend Automation & Scheduled Services

TECHINICAL SKILLS

- Programming Languages:** C#, T-SQL, JavaScript, HTML5, CSS3
- Backend Development:** .NET 8, .NET Core, ASP.NET Core, ASP.NET Framework 4.8, ASP.NET Web Forms, Entity Framework Core, Dependency Injection, Async/Await, Windows Services
- API Development & Integration:** ASP.NET Web API, RESTful APIs, JWT Authentication, Third-Party API Integrations, Multi-Company Application Support
- Database & Data Access:** MS SQL Server, LINQ to SQL, Entity Framework Core, Stored Procedures, Triggers, Multi-Tenant Database Optimization, Dynamic Data Access
- Frontend Development:** React.js, Telerik UI, Bootstrap
- Application Support:** Authorization Services, PDF & Email Reporting, Scheduled Jobs
- Development Tools:** Visual Studio, Git, GitHub, Postman
- Methodologies:** Agile/ Scrum

WORK EXPERIENCE

Software Engineer | Veyron Technologies – A Complete IT Solution Provider | Jun’23 – May’26

- Maintained Automanager, an **ASP.NET Framework 4.8** Bodyshop Management System supporting multi-company operations, covering user authentication, branch management, LINQ to SQL data access, dynamic authorization, job cards, invoicing, estimates & automated notifications.
- Engineered a SQL Server-optimized **Bulk Copy functionality** for high-volume job card and estimation processing, reducing technician processing time by **70%** across hundreds of records and implemented automated error handling and exception management for faulty file processing in **Windows Services**, reducing maintenance workload by **80%**.
- Integrated **QR and Barcode scanning** based on customer Bodyshop requirements, accelerating job card processing, minimizing manual data entry and supported the **Workshop Time Management application using ASP.NET Web Forms and Bootstrap** for technician authentication.
- Developed **RESTful Web APIs using .NET 8 & Entity Framework Core** for the Inspection Phone-App application, enabling vehicle inspection, multi-tenant data management, real-time integration with **Bodyshop Management Systems, JWT authentication & automated PDF reporting**.
- Enhanced the **Genesis messaging system using ASP.NET 4.8**, supporting cross-application notifications and pager services across enterprise automotive platforms and managed application-level integration across connected automotive systems.
- Designed and maintained **6 scheduled Job Services** to automate reporting, vehicle stock processing, job creation, estimate management, external system integrations, business data synchronization and KPI dashboard generation.
 - GCEmailReport:** Automated PDF, Excel and CSV reporting via SMTP.
 - GroupeCatImportService:** Managed vehicle stock import and validation.
 - GroupeCatService:** Automated job creation and estimate data insertion.
 - AxaltaIntegrationService:** Integrated paint and parts data.
 - GTGlobalIntegrationService:** Managed attachment and business data import/export.
 - AutomanagerPurpleRockService:** Synchronized business data across systems.
 - ScheduleKpiDashboardService:** Generated multi-tenant KPI dashboards.

ACHIEVEMENTS

- **Improved API response efficiency** through optimization of backend processing, database interactions and Entity Framework Core data-access workflows for vehicle inspection services.
- **Increased automated reporting accuracy** by standardizing scheduled PDF, Excel and CSV report generation and reducing dependency on manual reporting processes.
- **Improved scheduled service execution reliability** by strengthening processing logic, validation mechanisms and exception-handling workflows across enterprise job services.
- **Enhanced scheduled service execution reliability** by strengthening processing logic, validation mechanisms and exception-handling workflows across enterprise job services.
- **Increased data synchronization efficiency** through automated integration workflows connecting vehicle, business, attachment, paint and parts data across multiple enterprise systems.

EDUCATION

B.E + M.Tech Integrated Program | 2019

University Institute of Technology, Rajiv Gandhi Prodyogiki Vishwavidyalaya, Bhopal

PERSONAL PROJECTS

FileOrganizer – Automated File Organizer Utility | Tech Stack: .NET 8 Console Application, Windows Task Scheduler.

- Developed an automated file organization utility with **extension-based folder categorization, dynamic subdirectory creation and scheduled hands-free execution.**
